WORK EXPERIENCE

Junior Software Developer   **September 2022 – Present**
Verifone (2checkout)   *Bucharest, Romania*
Working day by day on maintaining and developing marketplaces and new versions of the Avangate cart.
▶ Using JS libraries and frameworks (JQuery, VueJS), NPM Packages, Gulp, Bower.
▶ Good understanding of async request handling, partial page updates, and AJAX.
▶ Writing semantic, modular front end code using HTML5, CSS3 (including Flex-box/Grid), SASS/LESS preprocessors and W3C coding practices.

Intern Software Developer   **June 2022 – September 2022**
Verifone (2checkout)   *Bucharest, Romania*
Studying the Avangate legacy code base and the tech stack used for building it.

JavaScript Algorithms and Data Structures; Responsive Web Design.

Udemy   **December 2021 - Present**
ZTM The complete Web Developer 2022 (certificate/UC-7a782627-3a46-4027-872b-d23c47d1bbf7/)
JS The Advanced Concepts 2022 (certificate/UC-cccf477d-fff8-4899-89c9-992dfa76e567/)
Advanced CSS and Sass (certificate/UC-b628c4e6-8b72-4250-bff2-46c70830eb2c/)
The complete JQuery Course (certificate/UC-c5d9704f-9ee0-4e8a-a559-d9f82318a625/)
The complete Node.js Developer Course (certificate/UC-ee8e01e4-4392-48de-876b-3c3422915547/)

University of Bucharest, Faculty of Geography   **October 2012 - July 2015**

TECHNICAL SKILLS

Programing Languages: HTML, CSS, JavaScript;
Frameworks/Libraries: Bootstrap, JQuery, Gulp, Bower, React, Vue;
Preprocessors: Sass, Less;
Software: Node, Git, Postman;
Others: Jira, Figma, Excel;

PERSONAL PROJECTS

Notifications page component (https://github.com/stefrotaru/notifications-page-main) - simple notifications page component built with Vue3 and Sass.
Expenses React App (https://github.com/stefrotaru/Expenses-react-app) - basic react app that keeps track of your expenses. The main objective of this app was to get used with the useState react hook.
Smart Brain React App (https://github.com/stefrotaru/smart-brain-facialrecognition) - face recognition app that allows users to create their own account and store it into a database, takes in a URL of an image and highlights the faces inside the image and keeps a count of how many times the user used the face detection API. Developed using: ReactJS, Clarifai API, NodeJS, ExpressJS, Bcrypt and PostgreSQL. Deployed on Heroku.

LANGUAGES

Romanian (Native), English (Fluent)

OTHER SKILLS

Problem-solving/ Team worker/ Creative, I like turning everything into art/ Flexible, capable of adapting to different work environments with ease/ Excellent communication skills/ Eager to learn/ Hard worker

INTERESTS

Guitar - self-taught, a great hobby which taught me that practice makes perfect.
Video games - passionate about video games since I was a child, I find them to be great for developing problem-solving skills and connecting with people from all over the world.
Traveling - I always considered that discovering new cultures and landscapes broadens the mind.
I like to believe that I live to provide more value than I capture.
